EVITERNSHIP

FULL - STACK WEB DEVELOPMENT JOB BOOTCAMP

A 6-months bootcamp to help you land your dream tech job

What is the future of

Software Development in India

$500 Billion
Tech Industry revenue by 2030

India's technology industry is on track to double its revenue to $500 billion by 2030 as the country emerges as the fulcrum of an increasingly digitised world

nasscom

2x Growth
In new startup by 2030

India's startup ecosystem is forecasted to expand, potentially doubling in size by 2030. This growth will create diverse job opportunities in tech roles, fueled by innovation and entrepreneurial ventures.

nasscom

68,000 Tech Startups and growing

According to a report by NASSCOM, India is home to 68,000+ tech startups, with the number growing every year. More tech startups mean more high quality product-based tech jobs.

nasscom

Global Hub for Tech Innovation

According to a report by BCG, India has the potential to become a global hub for technology innovation, because of its large pool of skilled talent, growing startup ecosystem, and government initiatives such as Digital india and Make in India.

BCG

Digital India Initiatives

Future tech innovations in India are expected to transform multiple sectors, including education, healthcare, and e-commerce. The Open Network for Digital Commerce (ONDC) aims to level the playing field for small merchants, indicating a focus on inclusive growth.

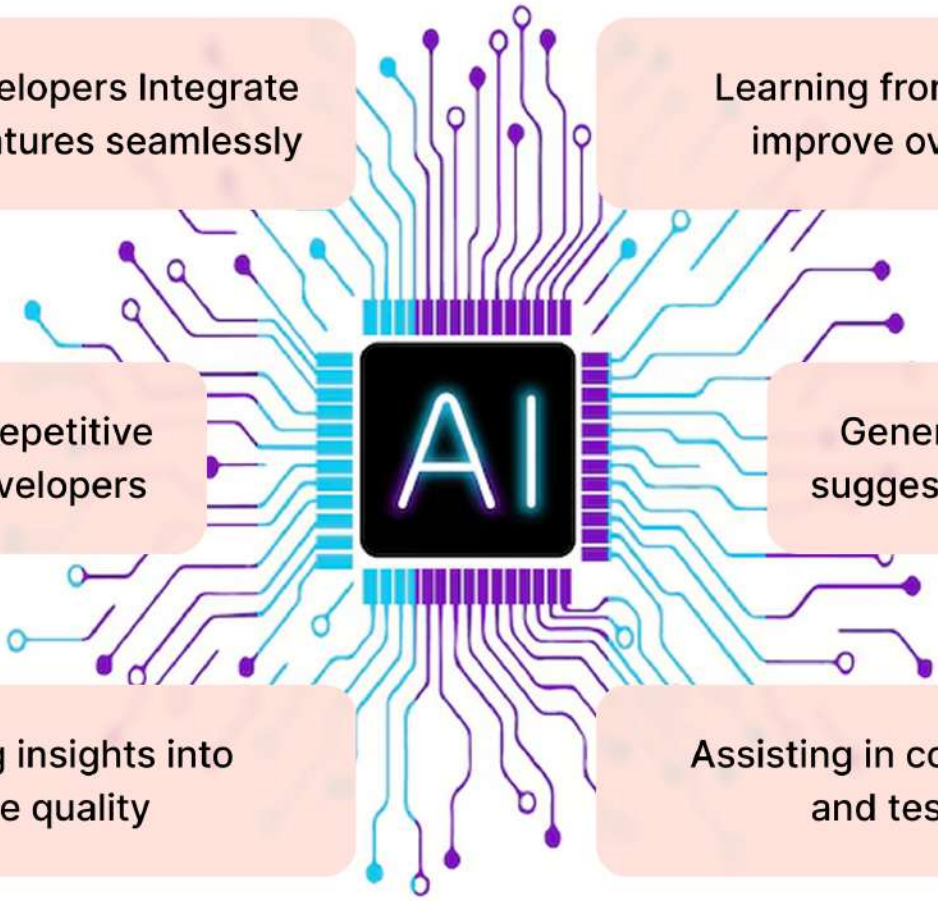
McKinsey & Company

Web Developer's Ally

"AI is not Going to replace programmers, but programmers who use AI will replace those who don't.

Helping developers Integrate powerful features seamlessly

Learning from data to improve over time



Automating repetitive tasks for developers

Generating quick suggestions for fixes

Providing insights into code quality

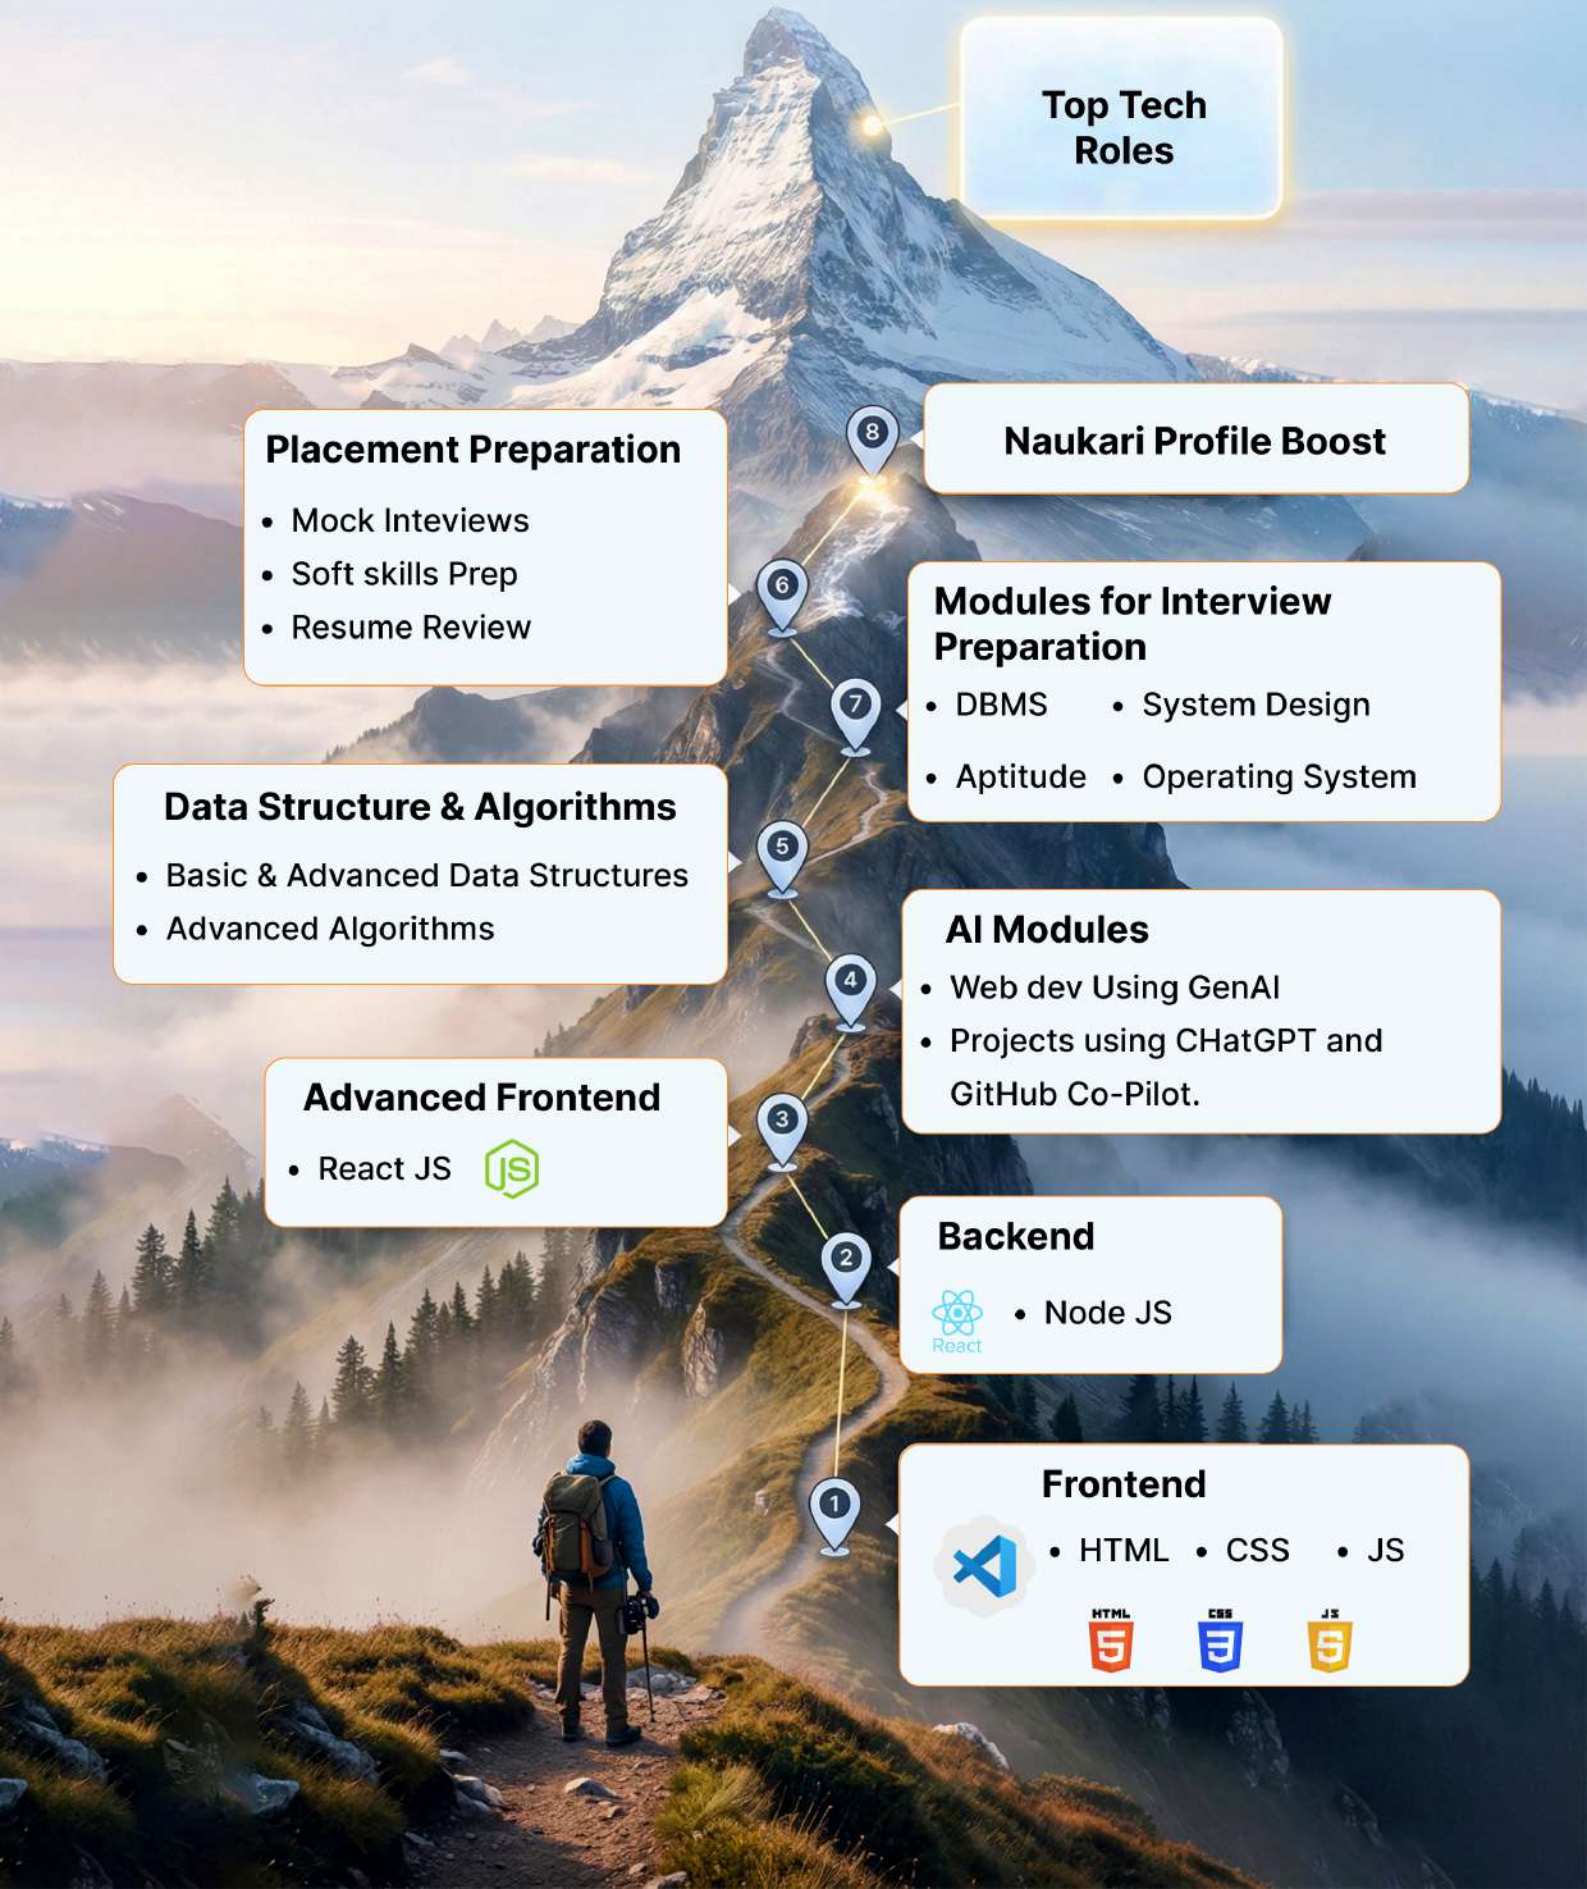
Assisting in code review and testing

AI will not replace developers, will instead create more work for them.

Thomas Dohmke

CEO at **GitHub**

Your 6 Month Journey To Success



Attractive AI Module

To the end of this course students will be able to successfully:

Masters Prompt Engineering

Implement efficient prompt engineering to the queries related to web development

1

Leverage AI Tools Strategically

Use the available AI tools for their web development projects efficiently and to the maximum extent possible.

2

Troubleshoot AI Errors

Diagnose and rectify common issues arising from AI tools, including incorrect code generation. Learn debugging strategies specific to AI-generated code.

3

Understand AI limitations

of these AI tools and work hands-on on the open queries beyond the scope of AI currently available.

4

AI Tools and Tech-stack covered

Tools covered:

Gemini

GitHub Copilot

Tech-stack covered:

MongoDB.

EXPRESS Js

React

node JS

Projects

Social Media Project

Using ChatGPT and Sub Copilat

Develop and optimize a social media web app focusing on design, API endpoints, core features, testing, and deployment.

Interviewer Project

Using ChatGPT

Building an interview simulator project which takes tech rounds after parsing through the uploaded resume.

Music Player

A music player like Spotify/Youtube Music using HTML, CSS and JS

Authentication project

Using ChatGPT

Develop a secure authentication system using ChatGPT, MongoDB, & JWT tokens.

BusyBuy

A web-based application that allows users to browse and purchase products online.

PhotoFolio

An online photo album app to upload, organise, and share digital photos.

Easily

A job portal based on MVC architecture for recruiters and job seekers to discover and apply for suitable roles.

Stock Market Analysis

A project for Stock Market Analysis to get real-time insights on stocks

& more

Developers Club

An exclusive community of students, in partnership with Coding Clubs & top industry developers as mentors, driving excellence in competitive programming and open source projects

Activities/Events : What to expect

Expert talks

Open source project

Focussed workshops

Industry talks

Contests

Hackathons

"Success is the sum of small efforts repeated day in and day out." - Robert Collier

By the end of the program you'll become a

Master Builder!

Full-Stack Proficiency

Skills

UI, UX, server-side logic, database interactions

What you'll be able to do:

Build a social media platform where users can create profiles, post updates, and connect with others, all while managing the backend infrastructure to handle user data securely

MongoDB. EXPRESS Js React node

Frameworks and Libraries

Skills

Leverage pre-built components and modules to streamline development

What you'll be able to do:

Use React to build a responsive user interface for a web application, or use Node.js and Express.js to create a lightweight and scalable backend

React

Job-Ready Skills

Skills

Be well-equipped for a variety of job opportunities

What you'll be able to do:

What you'll be able to do:
You could pursue roles such as a frontend developer, backend developer or a full stack developer depending on your interests and career goals.

Security Implementation

Skills

Protect web applications from cyber threats

What you'll be able to do:

Use authentication and authorization mechanisms to ensure that only authorised users have access to sensitive information.

Continuous Learning

Skills

Embrace a mindset of continuous learning

What you'll be able to do:

You could learn new programming languages, frameworks, or tools through online courses, workshops, or community events to expand your skill set and enhance your career prospects

Problem-Solving Skills

Skills

Troubleshoot issues and find solutions to complex problems

What you'll be able to do:

What you'll be able to do:
You might encounter a bug in your code that is causing a website to crash, requiring you to analyze the code, identify the issue, and implement a fix.

Version Control Mastery

Skills

Track code changes and collaborate with team members

What you'll be able to do:

Use Git to manage different versions of your codebase, allowing you to easily revert to previous versions if needed.

Performance Optimization

Skills

Reduce server response times

What you'll be able to do:

Use image compression to reduce the size of images on a website, making the site load faster and improving the user experience.

Agile Development Practices

Skills

Emphasize iterative development, collaboration, and flexibility

What you'll be able to do:

Use Scrum to break down a large project into smaller, manageable tasks called sprints, allowing you to deliver incremental updates to the project and gather feedback from stakeholders along the way.

Your Dedicated Success Partner

(Relationship Manager)

Each Job Bootcamp student is assigned a dedicated Success Partner.
A Success Partner actively contributes to your success and the effectiveness the learning program, while fostering a supportive and effectiveness of the environment for you.

Roles and Responsibilities of a Success Partner:

- Provides support to learners throughout their 6-month learning Journey.
- Provides timely responses to inquiries, feedbacks or escalations, ensung learners receive the support they need when they need it most.
- Tracks your progress and ensures you receive the personalised support to achieve your learning goals and maintain momentum to complete the course.

How to seek assistance?

1. After onboarding, your Success Partner will be in touch with you for the rest of the bootcamp.
2. Whenever you have any queries, you can call our Support Team from Monday to Saturday 10 AM to 7 PM.
3. Support Team Contact : 6304237115
4. Alternatively, you can also create a customer support ticket by sending an email to supporteam@eviternship.com

Things to keep in mind before you start the bootcamp

Before starting the Job Bootcamp, there are several key things to keep in mind to ensure a successful and fulfilling experience

Dive into the Course

Fully engage with all lectures and tasks to kickstart your learning journey and set a positive tone

Adjust to Study Mode

Transitioning from work to study mode might be tough initially. Take it slow, seek help when needed, and trust the process.

Get to know the Platform

Spend time exploring the online classroom to get comfortable with its features and navigation. as it's your main learning hub

Connect with Your Success Partner

Your Success Partner is key. Build a good relationship with him/her for guidance and support throughout the bootcamp

Embrace Hard Work

Approach the bootcamp with a dedicated mindset. See it as a chance to make strides in your career and commit to putting in the effort needed to succeed.

"Success is not final, failure is not fatal; It is the courage to continue that counts." - Winston Churchill

We are here To Help

For any questions, support and everything in between
